Response to Arguments

1. Applicant's arguments with respect to claims 19-56 have been considered but are moot in view of the new ground(s) of rejection.
2. Although Applicant has canceled previous rejected claims 1-18 and added newly cited claims 19-56, Examiner would like to point out to Applicant that there is a newly cited double patenting rejection.
3. In addition, as a result of Applicants amendment to the claims, there now exist 112 rejections.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 39-56 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding independent claim 39, Applicant is claiming a "computer readable medium," which is not described in the specification.

Although Applicant does disclose a "storage medium" in line one of page 17, Applicant fails to describe claimed "computer readable medium including program code stored," which is considered as being new matter.

Since dependent claims 40-56 depend on claim 39, claims 40-56 are rejected as well.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 37 and 38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In both claims 37 and 38, Applicant indicates that claims 37 and 38 both are dependent on canceled claim 1.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 19-36 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims **19 and 21 thru 37 of U.S. Patent No. 6,693,920**. Although the conflicting claims are not identical, they are not patentably distinct from each other because of the following reason.

Claim 19 of the instant application is anticipated by claim 19 in that claim 19 of the Patent contains all the limitations of claim 19 of the instant application. Claim 19 of the instant therefore is not patentably distinct from the earlier patent claim and as such is unpatentable for obvious-type double patenting.

Also, the dependent claims 20 thru 36 of the Application contain the limitations of dependent claims 21 thru 37 of the Patent, therefore, claims 20 thru 36 are rejected as well.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
